CAPITAL

Investor Presentation

The Power of Our Insights, the Courage of Our Convictions.

AUG 2025 | STRICTLY CONFIDENTIAL

CAPITAL: OVERVIEW

CAPITAL

Healthcare-focused equity firm leveraging extensive medical and investing experience to identify transformative investment opportunities.

Strategy

Through our fund (" Fund I" or the "Fund"), we invest across the entire pubic-market healthcare spectrum, employing experience-driven insights and meticulous diligence through a specialist network of personal relationships to discover paradigm-shifting innovations others overlook or misunderstand.

Our ability to invest across market capitalization, development stage, and subsector, along with a flexible mandate for exposure and strong risk management protocols should allow the Fund to outperform in the long term.

A single-fund approach aims to concentrate long-term returns.

Leadership

, CEO and Portfolio Manager, brings to over 25 years of clinical and academic medical experience combined with two decades of top-tier targeted investment expertise.

The Fund's approach is based on the same strategy and process deployed in the successful legacy funds managed by , excluding aspects that had a negative effect on performance and an expanded mandate to capitalize on all high-potential ideas.

Strategy

Target Annualized Net Return	15-18%
Target AUM (in 18-24 Months)	$200M (Capacity to scale to $2B)
Duration	Open-Ended

Current clients are sophisticated investors with a long-term investing bias, seeking differentiated, high-return outcomes from the healthcare public markets.

STRICTLY CONFIDENTIAL. NOT FOR DISTRIBUTION.

THE HEALTHCARE INVESTING OPPORTUNITY

CAPITAL

Sector-specific structural and temporal factors create enormous potential value for investors.

Strong & Attractive Public Market

Healthcare a massive growth industry:

$5T AND GROWING[1]

- Essential sector, less susceptible to economic downturns
- Pricing power, high margins (70-90%), high revenue growth
- Largest returns result from truly transformative innovation

Powerful Drivers of Innovation

FDA approvals of biosimilar and reference drugs:

2024 HIGHEST IN HISTORY[2]

- Novel tech (AI, RNAI, gene editing, etc.) speeding up development
- FDA hosted biotech CEO roundtable to frame policy for supporting innovation, exemplifying industry-friendly trend

Fundamental Pressures Propelling Value

U.S. SMID-cap biotechs:

30% TRADING AT OR BELOW CASH[3]

- Big Pharma facing $180B at risk from patent cliffs, significant M&A in SMID companies will result[4]
- High capital needs driving companies to public markets early

1. CMS National Health Expenditure Fact Sheet, March 2025 Update
2. Federal Drug Administration, Center For Drug Evaluation and Research, "New Drug Therapy Approvals 2024"
3. Bloomberg screening of Nasdaq Biotech Index constituents, as of July 2025
4. Evaluate Pharma, "Patent Expiry Impact Analysis 2025-30"

STRICTLY CONFIDENTIAL. NOT FOR DISTRIBUTION.

THE CHALLENGE AND THE SOLUTION

CAPITAL

Most healthcare investment managers lack the ability to access the huge opportunity.

Long development cycles and high failure rates are common

Valuation and top-down analysis alone are misleading, so it's necessary to understand the medical impact and value proposition. Most funds do not have the internal expertise or access to it.

Failure rate is high, so identifying future winners is crucial – and impossible without differentiated insight.

Most funds are constrained by narrow mandates

Siloed by subsector and other portfolio parameters, they can't be fully opportunistic and miss out on many high-potential investments.

Innovation by its nature is unpredictable

Opportunities don't follow set patterns, aren't distributed evenly across subsectors. Knowledge-driven insights necessary to identifying game-changing potential are unavailable to traditional generalist or single-sector funds.

Capital I is uniquely positioned to capture the opportunity

Unusual blend of clinical, industry, and institutional investing experience

Delivers insight unavailable to traditional generalist or single-sector funds

Long-standing relationships across healthcare value chain

Enables proprietary diligence and differentiated access

Optimized strategy based on top-tier legacy fund

Maximizes factors contributing to performance, excludes factors that detracted

Single open-ended fund structure

Avoids cross-fund dilution and allowing capital to follow the best ideas across subsectors, stages, and market caps

STRICTLY CONFIDENTIAL. NOT FOR DISTRIBUTION.

FUND INVESTMENT STRATEGY

CAPITAL

[redacted] targets healthcare companies whose technological developments reflect high potential for industry transformation.

Identification of intersections of early-stage innovation and unmet needs

Continuous engagement in frontline medicine, translational research, and industry forums

Independent, in house analysis to create information arbitrage and avoid crowded theses

Connect with industry professionals for 360° perspective

We seek to identify market and/or company specific dislocations and capitalize on the resulting mispricings

Rigorous bottom-up evaluation of upside potential and downside risk

Science and clinical trial data, FDA pathways, payor coverage, market adoption potential, etc.

Financial and market factors, including projected inflection points for company valuation

In-person dialogue with managements (leadership capability, governance, alignment, etc.)

Diligence within proprietary network to avoid groupthink and confirm technological differentiation

Flexible mandates to ensure Fund is truly opportunistic

Ability to invest across entire healthcare ecosystem

No target or cap on company stage, market capitalization, or size

Open-ended, concentrated structure (no cross-fund dilution and net exposure and benchmark constraints)

Flexible long bias (captures upside from breakthroughs and M&A activity and provides tax efficiencies)

STRICTLY CONFIDENTIAL. NOT FOR DISTRIBUTION.

INVESTMENT PHILOSOPHY

CAPITAL

Capture Opportunity

Our flexible mandate reflects our belief that strong investment returns result from the ability to capitalize on potential wherever it's found.

Thus, we have only one investment thesis: when we see an opportunity to maximize returns for our clients, we take it.

People Are What Count

We have found that one of the most important determinants of a company's success is the people behind it. If the management team can't execute, the power of the science will never be unlocked.

Likewise, we are highly selective about the firm's extended team of industry experts and our advisors and providers.

Our core beliefs ensure we remain focused on the best opportunities and on long-term growth.

Focus on the Long Term

Our experience demonstrates that real value is built over time, so we seek to partner with and advise company managements, to assemble a stable investor base that is philosophically aligned, and to steadily build our firm with strong and efficient infrastructure and a culture of compliance.

Embrace Volatility

If our research and projections are correct, an investment's volatility is something to be taken advantage of in the short-term and to benefit from in the long term.

STRICTLY CONFIDENTIAL. NOT FOR DISTRIBUTION.

MANAGER PROFILE

CAPITAL

A unique background as a medical doctor, faculty member, and hands-on investment professional.

, Chief Executive Officer & Portfolio Manager

MEDICAL EXPERIENCE

Bachelors in Biology
Doctorate in Medicine, 2004

Anesthesiology Residency 2004-2008

- Direct experience in key discipline
- Began to build network of relationships

Physician and Clinical Faculty 2008-2022

- Hands-on experience with patients, medical personnel, providers
- Increased and reinforced network
- Co-published five research papers and filed five patents

Adjunct Assistant Professor 2022-Present

- Continued reinforcement of experience and relationships

INVESTMENT EXPERIENCE

Pre-Professional

Independent Innovator/ Investor 1996-2004

Created medical product for new company (seed investor's first), successfully sold, gaining experience with consumer retail, distribution, supply chain

Research Associate 2005-2007

- Gained invaluable experience and connections creating startup for pain treatment, JV with VC, oversaw clinical trials, and roadshows, successfully exited

Healthcare Investment Professional 2011-Present

- Over time, took on more investment management responsibilities, including idea generation, competitive diligence, relationship management, position targets, etc., applying unique perspective from medical experience
- Mostly focused on flagship fund, but contributed to all funds
- Established connections with industry, political, and investment figures, as well as company managers

Capital

CEO & Portfolio Manager, 2025

- Prior to 2023, laid intellectual groundwork for at urging of seed investors
- Began model portfolio in 2023
- Founded in 2025
- Responsible for strategy and trading

RELATIONSHIP ADVANTAGE

CAPITAL

High-level connections across the entire spectrum of the healthcare industry developed over two decades.

Intelligence is gathered from an extensive group of trusted **members** which include relationships with colleagues and business partners developed over time (25+ years in medical field, 20+ years in investing).

The Nature of the Relationship Network

Members can come from personal relationships, such as former classmates, colleagues, and business associates, fostering a high degree of trust and disclosure, increasing the value of the intelligence.

Members come from a wide variety of disciplines and industries

The team is in constant contact with relevant **members** to support idea generation, due diligence, and monitoring of industry trends

- DOCTORS
- PAYORS
- INNOVATORS
- COMPANY EXECUTIVES
- ETC.

How the Relationships are Leveraged

The breadth and depth of this input helps to avoid "groupthink" and blind spots, and to find undiscovered sources of potential outperformance.

Informed perspectives provide understanding of the psychology of patients, doctors, and consumers – which are often drivers of trends and indicators of success.

This resource is superior to "expert" networks, which offer narrow, often tired perspectives shared with all paying customers, diluting competitive advantage.

The intricate and obscure nature of medical innovation makes information extremely difficult to "look up," presenting a high barrier of entry for those lacking such a resource.

"IN-HOUSE" RELATIONSHIP ADVANTAGE

CAPITAL

Seed investors and a developing Advisory Board include leaders in both the medical and investing fields.

Dedicated Investor Support

Early investment by strong and successful leaders validates KRI's mission and invites active and ongoing input to promote the Fund's success.

The group includes:

The founders of , a global CPG company

The medical director of Medical Center, who is also a serial founder of multibillion-dollar biotech startups and a professor of Cellular & Molecular Pharmacology who co-founded four public biotech companies.

The former head of corporate communications for

Expert Advisory Board

is actively assembling a Board of Advisors to enhance the monitoring of cutting-edge medicine and industry trends, provide strategic guidance, and accelerate decision making.

Our first member is M.D., Ph.D., President of one of the world's top biopharmaceutical companies, and a Fellow of the

We aim to have three-to-five board members in the near term, to ensure breadth as well as manageability.

INVESTMENT PROCESS

CAPITAL

Our tested methodology uses both human and tech-based resources to ensure thorough and dynamic execution.

Initial Screen

- Monitor industry information sources
- Capture exclusive input from network unavailable to other managers

Primary Analysis

- Appraise potential upside and risks over lifecycle
- Leverage network for scientific and clinical perspectives
- Review AI-based research and analysis
- Analyze competition

Advanced Analysis

- Investigate finances
- Forecast Inflection points in valuation of company over time

Management Assessment

- 360° review of managers' networks
- One-on-one meetings (career arcs, fiduciary duty, ability to execute, blind spots, etc.)
- Office visits (culture, collaboration, consistency of excellence, etc.)
- Alignment of business philosophies

Acquisition

- Determine position size based on existing portfolio
- Execute trade

AI-Based "Analyst Team"

- has developed an LLM that replicates a junior analyst.
- The model's performance has been accurate, incisive, and directly applicable to identifying and analyzing companies.
- We estimate the model's output is currently equal to three human analysts.
- To guard against echo chamber risk, multiple checks are run and the model analyzes gaps in its input.
- Currently it is an open-source model, but we are conducting ongoing development with a top-tier CIO to move to an in-house model over time.
- All work is vetted by the Manager, who performs final analyses and all investment decisions.

Post Investment

- Extend our expertise to company mangers for added value beyond capital.
- Perform daily portfolio checks (would we by the company today? Hold it? Sell it?)
- Trim to maintain appropriate position size.

STRICTLY CONFIDENTIAL. NOT FOR DISTRIBUTION.

PORTFOLIO CONSTRUCTION & RISK MITIGATION

CAPITAL

We assemble and maintain our positions with the ultimate aim of producing optimal, risk-adjusted returns.

Concentrated Portfolio

Typically, fewer than 25 publicly listed companies, with top 5–10 positions representing majority of invested capital.

No Subsector, Market cap, or Net exposure Mandates

Positions sized according to conviction, liquidity, and risk/reward.
Target cap of single positions at 10% of AUM, upper end only in cases of high conviction (outsize upside/low risk).

Flexible Long Bias

Predominantly long, with selective short positions in companies or programs with high conviction downside views, and opportunistic hedges during sector or market drawdowns.

Limited Leverage

Used sparingly (typically <10% of NAV), and derivatives are employed tactically for efficient exposure or risk management (not a core return driver).

Limited Hedging

Used only to reduce risk to Fund, e.g., failure of company clinical trial, major market disruption.

Liquidity & Capital Deployment

The Fund primarily invests in public securities.

The Fund does not invest in private companies inside the flagship vehicle, preserving liquidity for investors.

The Fund may opportunistically participate in private placements (e.g., PIPEs) or special situation financings via dedicated SPVs. Fund LPs will enjoy first-look privileges.

Gross & Net Exposures

Typical Operating Ranges

Gross Exposure	100-110% of NAV
Net Exposure	90-100% net long

The Fund can and will decrease net exposure well below 90% in isolated situations.

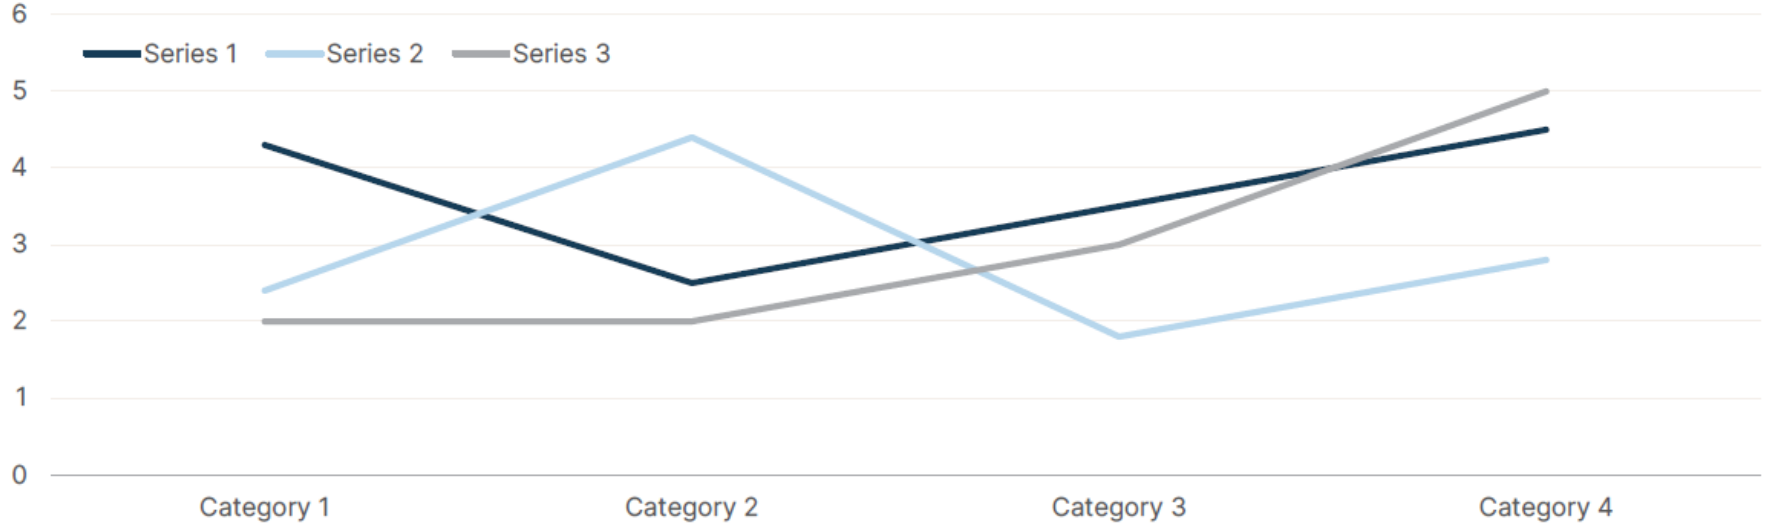

STRICTLY CONFIDENTIAL. NOT FOR DISTRIBUTION.

HISTORICAL PERFORMANCE

CAPITAL

The model portfolio's short-term track record is a limited but important indicator of future outperformance.

Model Portfolio Performance vs. Benchmarks

	2023	2024	2025 YTD	Since Inception
Net Return	00.00	00.00	00.00	00.00
Sharp Ratio	00.00	00.00	00.00	00.00
Ann. Volatility	00.00	00.00	00.00	00.00
Avg. Net Exposure	00.00	00.00	00.00	00.00

A Note on Monthly Returns: The Fund has a strong long bias, and therefore the Manager cautions that the monthly returns shown here are not instructive as to long-term performance. They are presented as a courtesy to investors and for discussion purposes.
A Note on Benchmarks: The unique mandate and structure of the Fund does not allow a single industry benchmark to provide a means of comparison for measuring performance. Thus, we have chosen to display four benchmarks, each of which reflects an important element of the Fund's market or competitors, and in combination should provide meaningful insight.

ORGANIZATION

CAPITAL

[redacted] has enlisted top-tier support in key management, operations, and support areas, carefully adding resources to scale.

FUND TERMS

CAPITAL

Structure	Onshore, Master Fund LP
Target AUM	Open-ended
Minimum Subscription	$500,000
Lockup	18 months
Highwater Mark	Year-on-Year
Management Fee	1.5% (Annual)
Performance Fee	20% (Annual)
Redemption	Quarterly, 90-day notice

Note on Target AUM:
anticipates the Fund could ultimately grow to $2B in AUM, assuming parallel growth in infrastructure and personnel.
Our projection of the first milestone in AUM, based on LP investment and portfolio growth, is $200M within 18-24 months.
The Fund currently enjoys 3-5 years of working capital, raised from its seed investors strategically to ensure a base from which to grow the firm, without the pressure of fundraising activities.

STRICTLY CONFIDENTIAL. NOT FOR DISTRIBUTION.

WHY [redacted] CAPITAL

CAPITAL

The Power of Our Insights, the Courage of Our Convictions.

Huge untapped opportunity in healthcare

Industry factors and market fundamentals in $5T-and-growing market present major upside for innovation-based investing.

Given market and fund-specific hurdles, most managers can't access the opportunity.

[redacted] relationship network is an asymmetric advantage

Long standing personal connections across healthcare value chain provide experience-driven insights and meticulous diligence.

+

[redacted] strategy, leadership, and resources make the opportunity accessible

[redacted] 25+ years of unique clinical, industry, and institutional investing experience provide insight and expertise unavailable to most managers.

Established ability to identify paradigm-shifting innovations others overlook or misunderstand.

Optimized strategy based on top-tier legacy funds

Built on past success, with expanded mandate to capitalize on all high-potential ideas and excluding aspects that impeded performance.

Single open-ended fund structure avoids cross fund dilution and allows capital to follow best ideas.

Ability to invest across market cap, development stage, and subsector should allow the Fund to outperform in the long term.
